Chief, Producers' Equipment Branch, ORR

Request for bibliographic data

1. It is requested that a bibliographic search be made on Soviet bloc "non-magnetic" diesel engines of 50 horsepower and over. (By "non-magnetic" is meant those whose non-magnetic content exceeds 50% of their total weight. This eliminates the majority of diesel engines, in which the non-magnetic content is less than 50% of their total weight, and in which this branch has no interest as far as the present project is concerned).

2. As this project has a very close deadline, it is requested that the data be supplied to this branch in any convenient form by 1 June 1959.

25X1A9a call 3. If further information on this matter is required, please extension 3647.
